The community needs our food bank more than ever

Our Food Bank’s New Reality

Due to COVID-19

40,000 people already dependent on Community Food Share because of COVID-19. 14,000 local kids relied on the National School Lunch Program new eat all their meals at home. 10,000+ Coloradans file unemployment claims in a single week in April — more than ALL claims in 2019. 40% of Americans don’t have enough cash on hand to cover a $400 unexpected expense.

While people are calling or writing to us on Facebook, asking how they can get help — many for the first time.

We're off to a great start, but we'll need even more resources going forward, because our community’s recovery period will last much longer than the virus itself.
